

Product Installation Instructions

Replacement Male Garden Hose End

To complete installation you will need:

- Replacement Male Garden Hose End (located in your kit)
- Parent/guardian

Instructions

1. Remove old male end of garden hose by cutting* through the hose parallel to the end, 2-3 inches from the end.
2. Loosen screws and slip collar over hose.
3. Insert new male end into garden hose making sure it's in as far as it will go.
4. Slide collar up over hose that is covering the new fitting.
5. Tighten screws until fitting is snug over hose. Check for leaks.

*Adult supervision required.
