

# Product Installation Instructions

## Water Timer

### To complete installation you will need:

- Water Timer (located in your kit)
- Old towel or rag

### Instructions

1. To install the timer, remove the hose from the outdoor faucet.
2. Screw the timer directly onto the faucet so the dial is facing upwards.
3. Screw the hose onto the outlet of the timer until it is tight.
4. Turn the dial to the desired amount of time you want the hose to run.
5. Once the timer has counted down to "0", it will turn off the flow of water.
