

Product Installation Instructions

Watt Meter

To complete installation you will need:

- Watt Meter (available for check-out through your teacher or the school library)
- Devices that use electricity which you would like to measure

Instructions

1. Choose a room to start your investigation. Try to find a room that has at least three devices that use electricity.
2. Plug the Watt Meter into the wall and plug one of the devices into the Watt Meter. Read the display to see how many watts that devices uses.
